Policy Number: WSB 220 154 525

About BE

With humble beginnings BE landscape construction has been built from 2 determined men and a second-hand work vehicle and grown to a company with over 20 employees and a large group of specialist subcontractors. Using this large workforce pool, we can scale to the labour requirements of almost any project and be trusted to achieve quality results in tight timelines by our clients in the builder, civil subdivision, commercial and residential markets.

Part of our success has been built upon the strength of our management team which has over 60 years' combined experience in construction management, infrastructure, landscaping and fencing in projects ranging from home renovators to large complex civil developments and everything in-between.

As a result of our strategic partnerships, we can provide a steady stream of materials this along our competitive pricing, our commitment to WH&S, our commitment to quality and environment stewardship, all these aspects combine and helps reduce the stress on our clients.

We focus on structural landscape however our skills are not limited to this with many successful softscape and streetscape projects under our belt. Our softscape division is multi-talented and willing to take on any challenge with a "can do" attitude.

We endeavour to offer our clients professional service no matter whether the project is a stand-alone service or a complete landscape project. We encourage early involvement in projects which allows us to help mitigate any issues in design, budget or timing, things which can heavily affect the outcomes of any construction project.

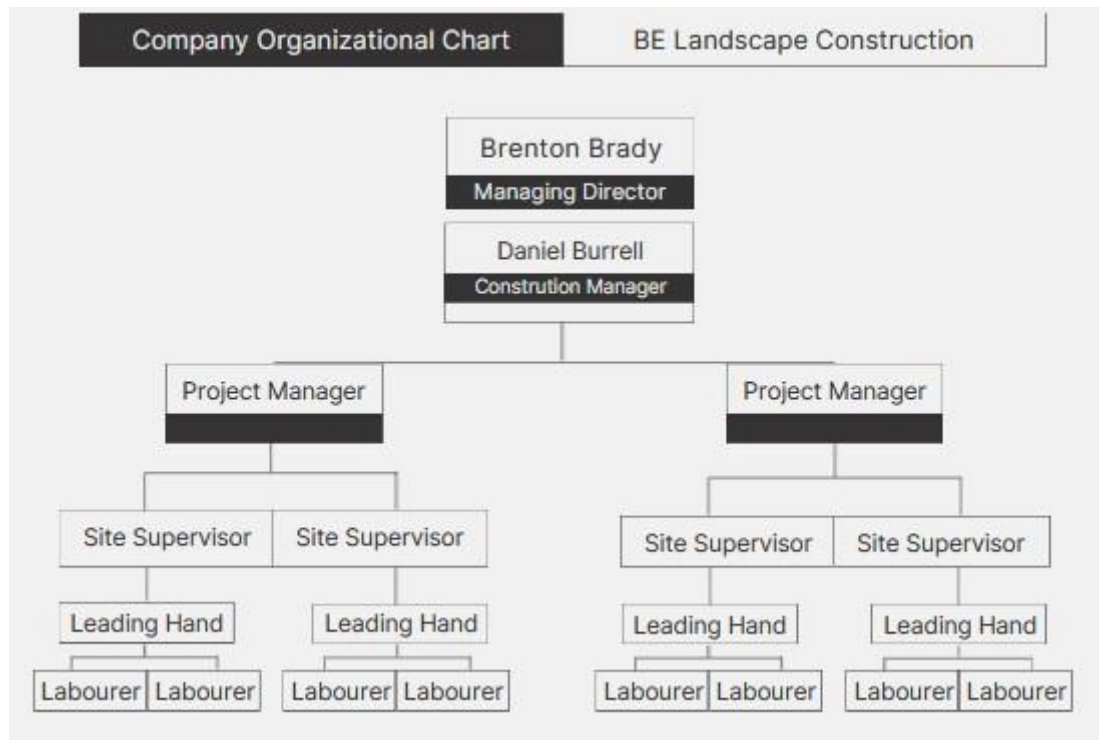

Products & Services

BE Landscape Construction services the civil, commercial, and residential sectors of the Construction Industry through the supply and installation of any and all Landscaping services.

Services include but are not limited to:

- Fencing of all types including Colourbond, timber, glass and more
- Retaining walls of all types including Concrete, timber, Fibre Reinforced Polymer (FRP) and block.
- Design and implementation of hardscape and softscape
- Bio Retention installation
- Streetscapes including park areas
- Drafting services.
- Concreting.
- Paving.
- Earthworks and site clearing.
- Expert maintenance recommendations to protect your investment.
- Assistance in DA and BA approvals.
- Assistance in engineering designs.

Company Structure

As Richard Branson once famously said **“Train people well enough so they can leave, treat them well enough so they don't want to.”**

Presently many of our employees have either completed a Certificate III in structural Landscaping or are in the process. Also, a prerequisite is that our Leading Hands, once having completed their Certificate 3 and a First Aid certification, complete a Certificate III in Building and construction. Upon achievement of which they will attain a QBCC Site Supervisor's licence. BE endeavour to upskill all our employees anywhere possible so that we can instil every bit of confidence in our potential and existing clients and preserve the utmost professionalism throughout our BE team. We believe with the level of education and experience we sustain throughout our company sets us apart from our competition.

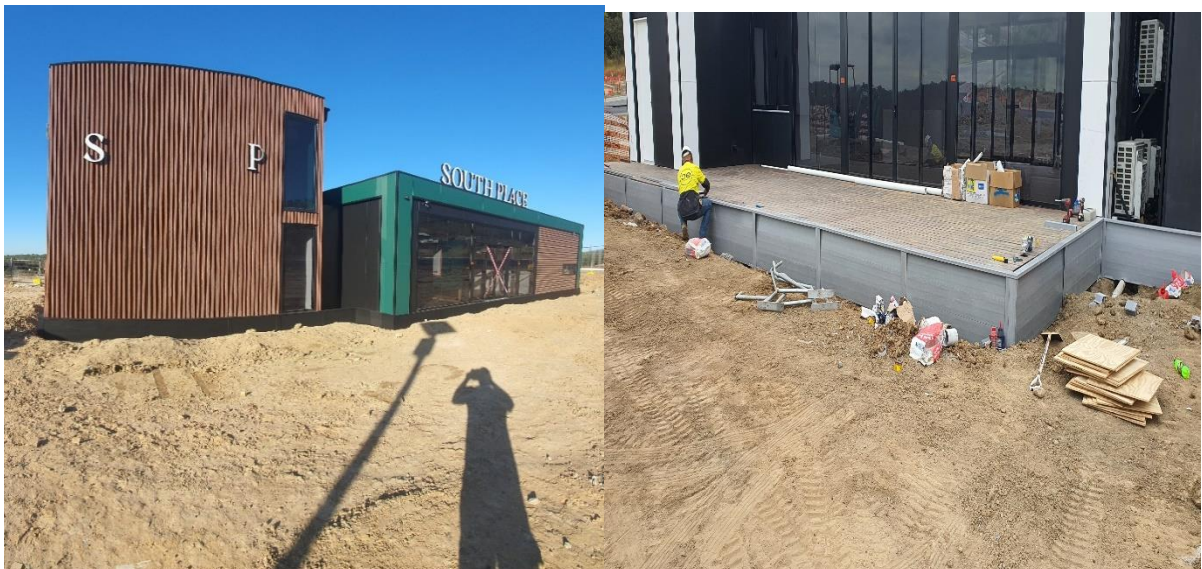

BE is committed to the Health and Safety of our staff; we continually observe and test new innovations on the market that help to reduce physical strain on our employees. For example, by using products like Fibre reinforced polymer sleepers we can dramatically reduce injuries and potential danger while increasing our productivity.

Example Projects

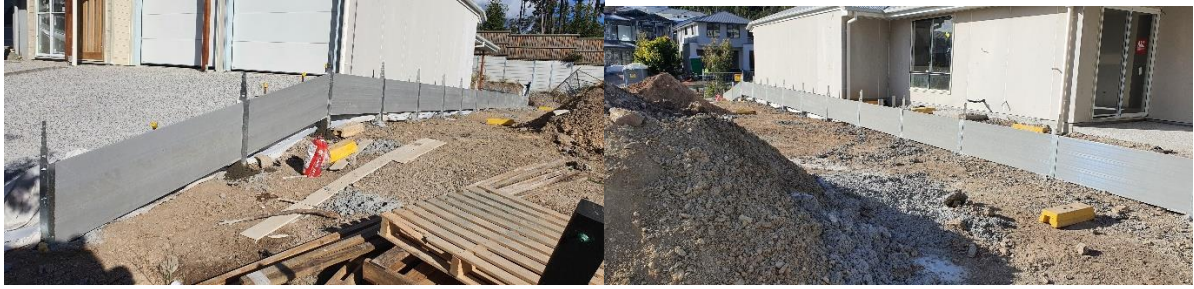

Helensvale

Fibre reinforced polymer sleeper wall with steel post painted in exterior paint, 2 meters max height.

Deebing Heights

Fibre reinforced polymer sleeper wall with FRP posts installed at base of sales office 0.6m max height, painted in exterior paint.

Barhs Scrub

Fibre reinforced sleeper wall with steel post, 0.6m high.

Brookwater

Treated Timber retaining wall 0.8m -1.0m tall.

Springfield

Subcontracted to build over 2000sqm of concrete sleeper wall ranging in heights from 1m – 3.5m.
